- Professional Services
- Turnkey Project

**Manschaft IT** a System Integrator is an **Arya Group** Company and was started in August of 2013 is the brainchild of **Mr. Nakul Arya** and **Mr. Moiz Patel**.

We are a vendor agnostic company who closely works with industry leading OEMs in various IT domains like **Networking, Cyber Security, IT and DC Infra**, Cloud and Hosting, Physical Security along with our own Service offering like **Managed Services, NOC, FMS and AMC, Turnkey Project** services across India.

## Smart Rack Solution

One of our PSU customer working in the field of Science and Technology was looking to build their in-house data center/server room. But due to space limitation and other factors like ease of deployment and manageability, total time of deployment, visibility, safety and security etc., they went for a smart Rack Solution which is not only easy to deploy but the total time taken to deploy was negligible compared to building a new server room with industry leading power, cooling and security solutions.

In this case the customer went with Rittal's EDGE Rack Solution. Following are the benefits of the solutions,

- Complete DC infrastructure solution offering Cooling, Fire detection & Suppression, UPS, Access Control & Remote Monitoring all integrated together inside a rack, resulting in less footprint and hence increased cost savings.
- "Zero U" rack based Cooling Solution with horizontal uniform cold air distribution with (N + N) redundancy.
- "One U" rack based Fire Detection (VESDA) & Suppression (Novec 1230 Gas) system
- Pre-designed and integrated package that is ready to be assembled at customer premises with rapid deployment in 3 - 4 weeks from order placing.
- IP-54 Racks ensure protection against ingress of dust and water
- No separate room required for Edge DC solution.
- High availability designs (N+N) for power and cooling Incorporates best practices from international standards like ASHRAETC9.9,NFPA75etc.
- Low Total Cost of Ownership, can be deployed in Modules of 1/2/4/6 racks, hence saving initial capital infrastructure required. Customer can enhance Edge DC infrastructure as computing requirement increases in future.
- Modular solution helps in easy relocation of site with less downtime.
